

ADDENDUM TO PARTS LIST

The rear axle on this kart has been improved with a rear axle machined from hexagon shaped bar stock instead of round bar stock.

The keys listed in your parts list that lock the rear wheels or wheel hubs, sprocket hub, and brake rotor to the axle are no longer required. The hexagon shape of the axle and the hexagon shape of the hole in the above parts eliminate the need for the keys.

The rear wheel assemblies, the sprocket hub, brake rotor, and axle bearings listed in your parts list are replaced with new part numbers. The new numbers will be the same as the listed numbers but with a "H" suffix. EXAMPLE (Part No. 3941 AXLE BEARING is replaced with Part No. 3941H AXLE BEARING)

Please update your PARTS LIST accordingly.
